

B33

THE FUTURE OF
BULLET-RESISTANT GLASS
IS HERE...

+ Lighter
+ Stronger

AGP Bullet-Resistant Glass with cutting-edge technology and advanced materials that create a product with superior ballistic performance and improved functionality.

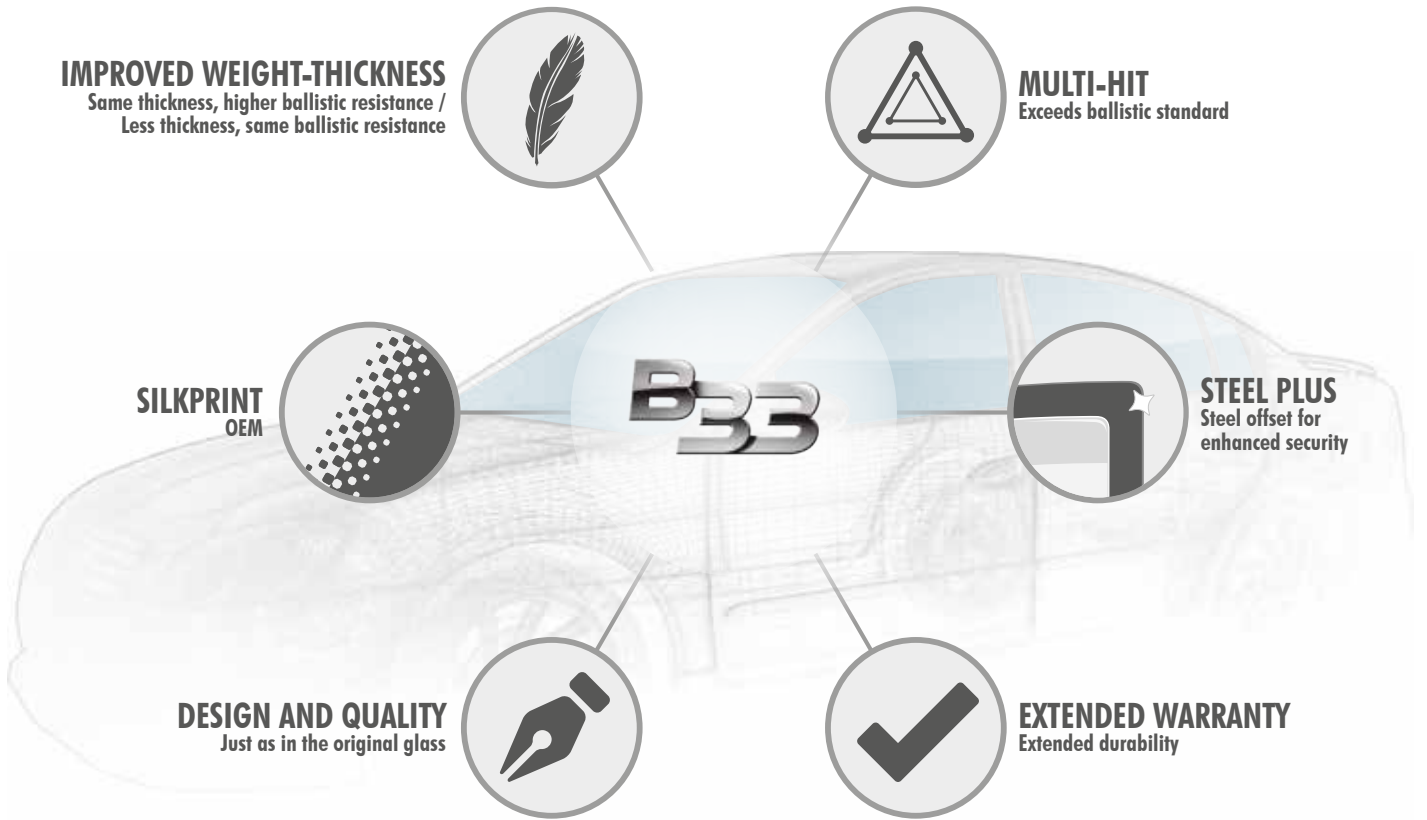

www.agpglass.com

For more than 50 years AGP has been leading the production of Bullet-Resistant Glass by developing products with cutting edge technologies and advanced materials, bringing innovation to Transparent Armor Solutions. All of this expertise has been included in B33, the most advanced BRG with exclusive technology.

B33 is a dual technology that incorporates special polymers and thermal treatments to the glass, generating the best BRG solution by optimizing the weight-thickness relation, improving ballistic performance and increasing the durability of the product.

Ballistic Standard: NIJ IIIA /CEN B4

**22
mm**

- .357 Magnum JSP
- .44 Magnum SWF
- 9mm FMJ
- .44 Magnum JSP*

***MULTI-HIT**
Magnum .44
50mm Triangle

OR

Additional Protection:

4 impacts with AK-47.
Ammunition: 7.62 x 39mm Lead Core. Shooting pattern: 400 mm square.

1 impact with AR15
Ammunition: 5.56 x 45mm M193.

UDRI Ballistic certificates available

USA · MEXICO · CENTRAL AMERICA · COLOMBIA · VENEZUELA · PERU · ARGENTINA · BRAZIL · SPAIN · GERMANY · MIDDLE EAST · INDIA · JAPAN · AUSTRALIA · EGYPT · SOUTH AFRICA · THE PHILIPPINES · POLAND · BELGIUM
